

WELCOME TO CREATIVE ZAGREB!

Here, you will find a selection of those individuals, companies, projects, places and sites that mark the contemporary identity and creative vision of our nation's capital. Led by imagination, creation and innovation, ideas are the key resource that define and shape new urban realities. Croatia, being a world known tourist destination for its rich cultural heritage, is faced with the challenge of setting pathways for presenting and affirming its contemporary talent in the global arena. Zagreb sets this pathway by showcasing its cultural and creative potentials in the Creative Zagreb City Map brochure. This brochure takes as its foundation a series of researches undertaken by the Institute for Development and International Relations, complemented by the professional analysis and input from the Zagreb Tourist Board and is produced as a part of the UNESCO-led project titled "Cool Industries for the Creative City".
